

AI-Powered Marketing Video using Lumen5

Philemon T Joseph | https://github.com/PhilemonTJ/FUTURE_PE_01

This report outlines the creation of an AI-powered marketing video for *GlowMate*, a smart LED desk lamp that merges modern aesthetics with intelligent functionality. Using tools like Lumen5 and DALL·E, the project showcases how AI can streamline the content creation process—from scriptwriting and image generation to video editing and branding. The final deliverable is a 45–60 second promotional video that highlights GlowMate’s features, use cases, and lifestyle appeal.

Tools Used:

- Lumen-5
- ChatGPT
- Dall-E
- Midjourney
- Canva-AI
- Imagen

Step-by-Step Workflow

1. Define the Product & Message

Product: GlowMate Smart LED Desk Lamp

Goal: Highlight its smart features, aesthetic design, and mood-enhancing benefits.

2. Write the Video Script (30-60 sec)

Use this for voiceover and text overlay in Lumen5.

Prompt: Could you give Outline of the script so that lumen can generate the final script accordingly; just the points/list

Response:

- **Product Name & Tagline**
 - GlowMate – Smart LED Desk Lamp
 - Tagline: “*Light your world, your way.*”
- **Introduction Statement**
 - Emphasize innovation in daily lighting
 - Modern, intelligent, elegant
- **Design Highlights**
 - Minimalist, modern aesthetic
 - Seamless fit in any workspace or bedroom

- **Smart Features**
 - App control: Brightness, color, schedule
 - Voice assistant compatible (optional)
- **Mood Sync & Interactivity**
 - Sync lighting with music or mood
 - Dynamic ambiance adjustment
- **User Benefits**
 - Focus lighting for productivity
 - Warm tones for relaxation
 - Suitable for students, creators, professionals
- **Lifestyle Use Cases**
 - Studying, working, reading, relaxing
 - Day to night transitions
- **Brand Personality**
 - Sleek, intelligent, lifestyle-enhancing
 - Future-forward tech + aesthetic comfort
- **Call to Action**
 - Buy now / Available now
 - Website or product page (e.g., www.glowmate.ai)
 - Optional: Social handles or hashtags
- **Outro Branding**
 - Logo animation or display
 - Final message: “GlowMate – Where smart living begins with light.”

3. Generate AI Images

Use DALL·E or MidJourney for these concepts:

Some Example Prompts for DALL·E / MidJourney

- “Minimalist smart LED desk lamp glowing in a dark modern room”
- “A futuristic LED desk lamp on a clean white desk”
- “Hand using smartphone app to change LED lamp color”
- “Student studying at night with cozy LED light”
- “LED lamp glowing with colorful music-synced lights in a cozy room”
- “Product showcase of GlowMate lamp with logo and CTA”

Example Pics Generated:

4. Create Video on Lumen5

- Upload your script to Lumen5 and auto-generate scenes.
- Replace default visuals with your AI-generated images.
- Add text overlays as per the script.
- Use soft background music (calm/electronic).
- Optionally add a voiceover (you can record or use Lumen5's voice feature).
- Brand with product logo, consistent colors, and modern font.

Final Voiceover Script:

[Opening scene – close-up of dimly lit workspace fading into brightness]

Voiceover:

"In today's world, every detail counts — and your lighting should be no exception."

[Cut to product reveal – GlowMate lamp turning on with a soft glow]

Voiceover:

"Introducing the *GlowMate* — the smart LED desk lamp revolutionizing your daily lighting experience."

[Scene transition – wide shot of a modern home office with GlowMate]

Voiceover:

"With a sleek, minimalist design, GlowMate complements any space — personal or professional."

[Visual – lamp changing colors to the beat of music]

Voiceover:

"Sync your lighting with music or mood for a personalized ambiance."

[Scene – user controlling the lamp via smartphone app]

Voiceover:

"Control everything with the GlowMate app — adjust brightness, change colors, and schedule with ease."

[Cut to user saying, “Hey Alexa, turn on GlowMate”]

Voiceover:

"Voice assistant compatible for hands-free control."

[Visual – user working at night under cool lighting, then relaxing with warm tones]

Voiceover:

"GlowMate provides focused lighting to boost productivity... and warm tones for relaxation."

[Montage – student studying, artist drawing, professional in video call]

Voiceover:

"Ideal for students, creators, and professionals — GlowMate adapts to your needs."

[Cinematic shot – GlowMate in various home settings]

Voiceover:

"Enhancing both work and leisure environments."

[Visual – fade-in logo with ambient glow behind it]

Voiceover:

"GlowMate embodies sleek intelligence and lifestyle enhancement..."

[Final screen – call to action with website URL]

Voiceover:

"Discover GlowMate today at www.glowmate.ai."

[Tagline on screen]

Voiceover:

"GlowMate – where smart living begins with light."

5. Final Edits & Export

- Add subtitles automatically in Lumen5.
- Review transitions and pacing (aim for 45–55 seconds).
- Export in HD with branding.
